Allianz 

Information for Installers of Photovoltaic Installations of up to 10 kW_p utilizing Talesun-Solar Modules

1 Electronics insurance with cover for yield deficits and yield guarantees

Talesun Solar Germany GmbH and Allianz Versicherungs-AG, both based in Munich, Germany, have agreed a collective contract for the insurance of electronic components, yield deficits and yield guarantees for photovoltaic installations with a performance of up to 10 kW_p, including the storage media. The collective contract enables end customers to profit from an excellent price/performance ratio.

The insurance cover is valid for two years for new photovoltaic roof and facade installations of up to 10 kW_p, in Germany, built using Talesun modules. **Talesun will pay the insurance premium for the first year.** The premium for the second year is paid by the customer.

Therefore, when invoicing for the photovoltaic installation, please increase the invoice amount by the amount of the annual premium for the second year of the insurance:

- a) for photovoltaic installations without storage device:
EUR 71.40 gross (including insurance tax)
- b) for photovoltaic installations with storage device:
EUR 96.39 gross (including insurance tax)

The insurance amount is the non-discounted new value (list-price of the complete installation, plus associated costs for packaging, freight, customs, and assembly). For installations located at buildings with substantial fire-risk, such as poultry farms or intensive livestock farms, sawmills, particle-board manufacturers, wood trade, paint and/or lacquer manufacturers, recycling

plants, waste incineration plants, chemical plants, foam manufacturers, textiles, saunas, discotheques or entertainment centers, insurance cover can only be given following case-by-case assessment, and written authorization from Allianz.

Yield Prognosis

Please provide the photovoltaic installation operator with a yield prognosis containing the following data:

- Projected annual energy yield for the first and the last year of operation, as well as average projected annual energy yields for the planned operational phase
- Applied reference datasets for the global radiation values (i.e. DWD 1981–2000)
- Manufacturer, type, peak-performance, and number of modules
- Total module surface area exposed to solar radiation (excluding module frames)
- Annual average value for horizontal global radiation, and the ambient temperature of the location of the installation
- Nominal yield of the installation
- Live date of the installation
- Inclination and orientation of the modules
- Degradation effects related to the installation
- Individual standard efficiency and specific (performance ratio)
- Existing potential sources of shade

2 Liability Insurance for Operators of Photovoltaic Installations

As a result of a surge in voltage from the installation, a failure occurs in the public power-supply. Talesun Solar Germany GmbH, and Allianz Versicherungs-AG, both

based in Munich, Germany, have agreed a collective contract for operator liability insurance, covering the operation of photovoltaic installations, utilizing Talesun modules, and with a performance of up to 10 kW_p. The insurance premium is to be paid by the customer.

Therefore, when preparing the invoice, please increase the net invoice amount for the photovoltaic installation (with/without storage device) by the gross amount for the operator liability insurance over two years of:

EUR 42.84 gross (including insurance tax)

3 Financing of the Photovoltaic Installation with the Wüstenrot-Turbo-Loan

With the Turbo-Loan from Wüstenrot, your client has the possibility of financing their photovoltaic installation to the sum of EUR 30,000: Simple, quick, and collateral-free. Further information is available on request.

4 Advantages for Talesun-Photovoltaic Installers

Faster insurance cover for your clients: By registration with Talesun, customers receive immediate insurance cover, an insurance certificate, and access to a qualified contact for all questions concerning insurance issues. With the insurance certificate your clients receive proof of cover, as well as all relevant information.

Fast repairs in cases of damage: In the event of an instance of damage to the installation which is covered by the insurance, you may – with the agreement of the customer – in the case of individual damage to the value of EUR 5,000, begin repair work to the installation, immediately. Parts must be retained for proof of damage.

Legal Certainty: Since 2009, only qualified insurance specialists may advise customers on insurance issues. In the event of queries, your clients may contact our hotline. All questions will be answered by qualified Allianz staff. In this way, installers carry no responsibility or obligation for advice on insurance issues.

Insurance Mediation and Contract Supervision

For the electronic insurance with cover for yield deficit, and yield guarantee, the liability insurance for operators of photovoltaic installations, and for the Wüstenrot Turbo-Loan, the Allianz general agency, Frank Baumgärtner is your qualified contact partner.

Please call us:

Monday to Friday
8.30 to 13.00
Monday to Thursday
14.00 to 17.00

We are happy to answer any queries by e-mail. Personal appointments can also be arranged.

Information on the Internet

Further information on insurance and financing can be found at www.allianz-baumgaertner.com.

Together with your clients, you can also click on the field 'Versicherungskonzept für Photovoltaikanlagen mit Talesun-Solarmodulen' (Insurance Concept for Photovoltaic Installations utilizing Talesun Solar Modules). You will then be directed to a page containing insurance conditions, types of cover etc.

Talesun – Allianz Service-Hotline

Do you have further questions? Talesun Solar Germany GmbH, in co-operation with Allianz Global Assistance International S. A. has set up a service-hotline to answer your queries and those of your customers. Call at any time with questions on insurance, financing, or in the event of damage or a photovoltaic related fault. The matter will be forwarded to the appropriate department at Allianz, Wüstenrot, or the photovoltaic installer. We are there for you around the clock, 365 days of the year.

0049.89.62424 361

We look forward to hearing from you.

Registration for Collective Contract

A table is provided for the entry of the basic required information (name and address of the operator, address of the photovoltaic installation, etc.). Please complete the table and send it asap to Talesun Solar Germany GmbH (sales.eu@talesun.com), to ensure insurance coverage from the earliest possible date.
