

PRESS RELEASE

Talesun and Rewa Solar Agree Module Deal in Excess of 1 MW

Top Product and Service Quality Make Talesun Shine

Munich, 13. March 2012: Talesun, a leading international producer of high quality solar cells and modules, and Rewa Solar announced the signing of a delivery agreement for the year 2012. The contract takes Talesun's growing presence in the German renewable energy market to a new level.

Talesun Solar Germany GmbH has been operational since September 2011. It will provide polycrystalline solar modules to REWA Solar, a German Photovoltaic (PV) Energy specialist from Paderborn. The modules are Talesun's type TP660P – 240W, which have an impressive efficiency rate of 15%. REWA Solar intends to install 80% of the modules on projects in the Westfalia region of Germany. The other 20% will be available for purchase through the company's wholesale network.

“We identified the Talesun modules because of their proven mechanical resilience and their reliability at guaranteeing high levels of energy conversion,” explains Bernhard Rehmann, CEO at REWA Solar. “In addition, Talesun is one of the few manufacturers with a fully automated production process. The company's progressive technology is not only evidenced in their product quality, but also in their ability to offer that quality at such attractive prices.”

Joachim Simonis, CEO of Talesun Solar Germany, GmbH, is also excited by the development. “We're very happy to cement our close business relationship with REWA Solar. We are still relatively new to the European market and aim to offer our clients more than just a high quality product. At Talesun we offer a promise of service quality that is the foundation on which we aim to build our presence in Germany and beyond.”
